MEMORANDUM ORDER NO. 06  
Series of 1993 

In line with the energy conservation program which is now further emphasized in view of power outages, everyone is enjoined to contribute to this measure.

Per DOLE Memorandum Order dated 07 December 1992, all offices are required to save ten percent (10%) of energy consumption. In this connection, all Directors of offices and Managers of branches are required to institute their respective conservation measures by cutting excess lights and unnecessary appliances.

The Building Management Unit (BNU) will make a regular round to check the observance of this policy on energy conservation.

Other economy measures are provided in the attached copy of an earlier memorandum on the same subject for your reference.

For strict compliance.

FELICISIMO O. JESON, JR.  
Administrator

08 March 1993
